

OVERVIEW

Island Pacific Allocation Manager helps retailers ensure that allocations out to their many channels are as effective as they can be to ensure that they are making the optimum use of their stock based on the demand of each selling channel.

Allocation Manager can integrate seamlessly alongside a retailer existing architecture or is also available with the Island Pacific SmartPlanning or SmartRetail module for a comprehensive Planning, Assortment planning, allocation and replenishment tool.

Its key focus is to simplify the Allocation process across a retailer's channels whilst providing allocation methodologies which adapt to a retailer's schedule and supporting the teams with as much automation as possible thereby allowing more time to focus on exceptions and where the opportunities are.

To find out more, or for a product demonstration, contact us today.

BENEFITS

- **Faster allocations.**
- **More informed decisions.**
- **Multiple allocation methods** to react to the business needs.
- **Happier teams.** A tool which gives the team all the information they need to automate and make informed decisions.
- **Ability to designate & prioritize** which products are allocated by junior allocations.
- **Opportunity to get the allocations correct** in the first place resulting in higher sales, lower markdowns and improved customer satisfaction.
- **Integrates seamlessly** with Island Pacific SmartSuite or third party applications.
- **Provides the tools** for the team to manage the exceptions.
- **Utilizes automatic store grading** tool based on business defined factors.
- **Utilizes advanced size profiling** tool ensuring allocations are based on the correct size profile mix.
- **Reduction in manual effort.**
- **Best practice retail** allocation management approach.

Island Pacific SmartPlanning includes the modules on the right, available separately or as an integrated solution:

“ We feel the Island Pacific SmartPlanning & Allocation Manager solution has rich functional applications, which will enable us to strategically manage all aspects of planning and allocation within our business. It will provide the merchandising team with industry best practice that includes modern, flexible, and timely planning techniques. The integrated allocation module will make full use of our plans to create greater efficiency for my team as well as more effective management of stock across the business. This will be important to ensure the continued international success and growth of our brand. ”
